

Technick Products, a growing chemical, additives and coatings manufacturer is seeking a Chemist for its expanding line of solvent and water based semi-permanent release agents for the plastics and rubber industry with a focus on Rubber and Polyurethane.

Technick Products is seeking a chemist who possesses strong technical knowledge and experience with abilities to contribute to the continued growth of the company. The position will incorporate working independently in addition to working as part of a larger team. The position will be responsible for improving existing product lines as well as new product development.

We offer a comprehensive benefits package including: health insurance, paid personal days, vacation, holidays, and profit sharing.

RESPONSIBILITIES AND DUTIES INCLUDE:

- Formulate and facilitate the development of new innovative products and product improvements
- Development of test methods
- Working together with business and sales teams to develop and recommend products

IDEAL CANDIDATE

- BS/MS degree in chemistry or closely related field with a minimum of four years of formulating work experience
- Knowledge of emulsions, oils, polymers, wax and silicone chemistries.
- Familiarity with analytical equipment such as FT-IR, DSC, TGA, particle size measurement and other testing methods.
- Ability to present the results of your work to cross functional teams.
- Ability to prioritize conflicting project needs and deadlines
- Hunger for knowledge and learning
- Passionate about chemistry and creativity
- A team player who recognizes that in the team's success lies their own success

To be considered, please email your resume to careers@technickproducts.com. All responses will be held in confidence.
